The world's first socially networked mobile.

This is beyond a web phone. This is a social networking mobile designed to keep you in touch and online wherever you are. Web essentials like Facebook, Skype, Ebay and Windows Live Messenger are always on, always connected ensuring you're never out of touch.

We believe your phone should do the hard work for you and that you shouldn't need a degree in nuclear physics to work it. Now here's the switcher. It runs along the bottom of your Home screen with all your favourite applications, so they're easy to get to and quick to open.

Your contacts used to be just a static list. Not now. We've brought it to life, integrating your Facebook, Skype and Windows Live contacts so when your friends' status (or even their profile pictures) change, you'll see it live in your Contacts.

It's never been quicker or easier to get online and keep connected with the things that matter to you.

First things first.

There are a few things you need to do to get your mobile working. Things like inserting your USIM and battery and setting time and date. Then there are the things that personalise the phone, like setting wallpaper.

Getting ready to go. That's what this section is all about.

The multipress, T9 and numeric input modes can be changed by pressing  # within a text box.

- **ABC Input:** use the keypad to enter letters, numbers, symbols, and other characters. Press the same key repeatedly to cycle through available characters. If you do not press a key for two seconds, the character in the block cursor is accepted, and the cursor moves to the next position.
- **T9 Text Input:** you press each key only once, even if the character you want is not the first character on the key. It tries to predict the word.
- **123 Input:** if you want to input a series of numbers, you need to change to 123 mode or press and hold the particular key for three seconds.
- **Symbol Input:** In ABC and 123 mode, short press  and you can access the symbol menu. While in T9 mode, press and hold  for a few seconds to access the symbol menu.
- Select **OPTIONS >** Dictionary > Add to/Go to, to view the dictionary or add new words to it.
- Press  # and scroll to select ENG to change the writing language. The options are:

Italiano	IT
English	ENG
Français	FR
Deutsch	DE
Dansk	DA
Svenska	SV

PHONE MAINTENANCE

The following advice can help you to look after your phone and prolong its life.

- The phone and its spare parts should be kept out of the reach of children.
- Keep the phone dry. Rain, moisture or water will corrupt its electronic circuitry. If your phone does get wet, remove the battery immediately.
- Don't put the phone in dusty places or this will affect the everyday use of the phone.
- Don't touch the screen with a sharp object.
- Don't expose the phone to high temperatures. High temperatures will shorten the life of electronic devices, destroy the battery and destroy or melt a phone's plastic shell.
- Don't expose the phone to low temperatures. Otherwise, when the temperature rises, moisture will condense in the phone and could damage the phone's electronic circuitry.
- Don't throw, knock or shake the phone intensely as this could damage the electronic circuitry and structure of the phone.
- Use a clean, soft cloth to clean the camera lens and other delicate surfaces.

YOUR MOBILE'S SCREEN

Your mobile's screen is divided into four basic screens:
the Status bar, the Main Screen, Switcher and the Prompt box.

STATUS BAR

Shows what operations are taking place, the battery and signal strength. See the next page for status icon details.

HOME SCREEN

If you are not on the Home screen, the screen will show the main menu or the submenu related to that particular feature.

SWITCHER

Quick access to all open applications and easy to close open applications.

THE PROMPT BOX

Displays various prompts in the soft key boxes. These are activated by pressing the appropriate left and right soft key under each one.

SWITCHER

No more tedious trawling through menus to find the things you use most often. The Switcher gives you instant access to things like Google or Facebook via a scrollable menu at the bottom of the Home screen. It shows your most important applications and anything you've got open at the moment.

You can choose to add or take away icons from the carousel, so if you've got a favourite application you can get to it straight away.

When you're using an application and you call up the Switcher, the home icon appears in the centre.

If the phone is idle, the home icon doesn't appear (seeing as you're already there).

- To add an item to the Switcher customise area, select **OPTIONS > Add items to switcher**.
- To remove item from the Switcher customise area, select **OPTIONS > Remove from switcher**.
- To set Switcher mode to Active one touch Switcher, select **OPTIONS > Activate one touch switcher**.
- To access an open application, use left or right key to select the application and then press **OK**.

Your mobile gives you an ultra high speed internet connection for your laptop when you're out and about.

It's simple to use as your mobile has in-built drivers that will automatically install when you first connect up to your PC.

Just plug your mobile into your laptop and installation will start automatically. The Mobile Modem software will start up on your laptop screen and you will see a button saying Connect. Click this and you'll get online.

SIGN INTO SKYPE

With Skype on 3, you can make Skype-to-Skype calls from your mobile. Which means you can call people all over the world who use Skype, including other Skype on 3 users.

IF YOU HAVE A SKYPE ACCOUNT

- Scroll to  from the Home screen and press OK.
- Select Sign in for existing users, then enter your username and password.
- Select Sign me in and set it as Automatically or Manually.
- If you select Automatically, you'll automatically sign into Skype each time you turn on your mobile.

IF YOU DON'T HAVE A SKYPE ACCOUNT

To create a new account:

- Scroll to  from the Home screen and press OK.
- Scroll to Create account for new users and press OK.
- Read the Skype End User Licence, Terms of Service and Privacy Policy available at www.skype.com/eula, www.skype.com/tos, www.skype.com/privacy or on the CD version of this user guide, select Accept and enter a username, password and an email address on the Create account screen.
- Select OK to save the settings.

LAST.FM

Last.fm is the world's largest social music platform, and a buzzing online music community. The 'scrobbling' function means that the music you're listening to is sent to Last.fm and added to your music page, so you can keep track of your favourites and your friends can see what you're into. And now you can scrobble from your mobile when you're listening to the music tracks you have stored on it.

Feeds are basically a way of letting you know every time there's a change on a website you like, as long as it provides an RSS feed. That could mean updates on news, sports scores, entertainment gossip – whatever you're interested in. It's easy to choose a new feed and set it up. You can also set how often you want to be updated with any changes on the website.

ACCESS TO FEEDS

- Press **MENU** from the Home screen, and select FEEDS.

ADD A FEED

- Press **MENU** from the Home screen and select FEEDS.
- Select **OPTIONS > Add a feed > OK**.
- To add a web feed from your browser, look for the RSS icon . When you see it use the **OPTIONS** menu to add the feed.
- Alternatively, you can enter a feed URL manually and select **ADD**.

VIEW A FEED

SET THE HOME SCREEN WIDGETS

With the widgets function, you can bring all the things you love right to your desktop – things like the weather, RSS, Yahoo search, Clock, Google search.

- Press  (up) from the Home screen and select Click to add widgets > ADD to add a widget directly. The phone has five preset widgets for you to select: RSS Widget, Clock Widget, Yahoo Search Widget, Weather Widget, Google Search Widget.
- On the Manage widget screen, use  (up) or  (down) to scroll to the desired widget, then press OK to select it, or you can select OPTIONS > Select widget, then click DONE and the widget will appear on the Home screen.
- To search for the desired widget, you can enter the widget name in the search bar until the widget is displayed. When you press a key, such as , you will find widget names that begin with 'A', 'B' or 'C'. The next key you press continues to narrow the search.
- Or you can select OPTIONS > View widget to view the details of the selected widget or select OPTIONS > Delete widget > YES to delete it.

NOTE:

If the widget is showing on the Home screen, please deselect it at first before deleting it.

What's everyone up to.

Imagine that your address book came alive and told you what your friends were up to and when they were online. That's what's your contacts can do. Instead of a static list you've got a live, constantly updating part of your phone. Information is pulled from Skype, Facebook and Windows Live Messenger to let you know who's online, what people are up to, what's going on.

ACTIVATE AND CHANGE YOUR USIM PIN

Your PIN (Personal Identification Number) code protects the information stored on your USIM.

To activate your USIM PIN:

- Press **MENU**.
- Scroll to select Settings > Advanced > Security settings > Activate PIN > Enable.
- Enter the default PIN 0000, and press OK.

CHANGE YOUR USIM PIN

Once you have activated your PIN, each time you turn on your mobile, you'll need to enter your PIN.

- Press **MENU**.
- Scroll to select SETTINGS > Advanced > Security settings > Change PIN.
- Enter your default PIN (0000), press OK and enter your new PIN (4-8 digit) twice.
- Select OK to save the setting.

Caution

- If you enter an incorrect PIN code three times in succession, your USIM and mobile functions will be locked. For more details, please refer to **SAFETY AND MAINTENANCE**.
- If you do not know the correct PIN code and PUK code, please contact your operator or network service provider.

CONNECT WITH A BLUETOOTH® HEADSET

Before making calls with a Bluetooth® headset, you must first set up the headset to work with your mobile. Once you've done this, your mobile remembers the headset's ID. You can find more details in your Bluetooth® headset user guide.

To connect with a Bluetooth® headset:

- Press **MENU**.
- Scroll to select **SETTINGS**
> Bluetooth > Switch on >
SELECT to switch on the
Bluetooth® function.
- Scroll to Search for new
devices > **SELECT**.

Make sure that your headset's Bluetooth® is switched on. See your Bluetooth® headset user guide for how to connect your mobile and headset.

TRANSFER FILES FROM YOUR MOBILE USING BLUETOOTH®

You can transfer files from your mobile to PC or to other mobiles via Bluetooth®.

- Press **MENU**.
- Scroll to select MY STUFF and select your preferred file.
- Select OPTIONS > Send as > Bluetooth > Select SEARCH and select the device you want to transfer to, then follow the instructions.

TRANSFER FILES BETWEEN YOUR MOBILE AND PC

Connect your mobile and PC using the USB cable. You don't need to install any drivers on your PC. You'll need to make sure that your mobile's memory card is inserted.

- First insert the USB cable into your handset and your PC.
- Select Memory card transfer.
- Open your media folder on your PC. Then drag and drop your preferred tracks between your PC and mobile.

TROUBLESHOOTING

Having problems with your mobile? See below for a list of common questions. If we can't answer your questions here, then just call us on 333 from your mobile or 0870 7330 333 from another mobile.

THE MOBILE CAN'T BE SWITCHED ON

POSSIBLE REASON	SOLUTION
You are not holding  down for long enough.	Press and hold.
The battery power is used up.	Charge the battery.
Incorrect battery insertion.	Check and insert the battery correctly.

THE MOBILE IS SWITCHED OFF AUTOMATICALLY

POSSIBLE REASON	SOLUTION
Low battery power.	Charge the battery.

THE CALL VOLUME IS TOO LOW

POSSIBLE REASON	SOLUTION
The call volume has been set too low.	Increase the call volume.

HELP

- TROUBLESHOOTING
- SAFETY AND MAINTENANCE
- INDEX

TROUBLESHOOTING

THE PERSON YOU ARE CALLING CANNOT HEAR YOUR VOICE

POSSIBLE REASON

Call status has been set to mute.

The microphone is too far from the sound source.

SOLUTION

Turn off the mute function on the call menu.

Put the mobile's microphone closer to your mouth.

THE INCOMING CALL DOESN'T RING

POSSIBLE REASON

The mobile has been set to silent mode.

The ring volume has been set too low.

The call diverting option has been set.

SOLUTION

Reset the ring type in Profiles to Normal or Loud.

Increase the volume in Profiles.

Cancel call diverting in Settings.

THE BATTERY CAN'T BE CHARGED

POSSIBLE REASON

The battery is worn out and the charging time takes too long.

The battery doesn't connect well to the mobile.

SOLUTION

Charge when the mobile prompts low battery.

Ensure the battery has been inserted correctly.

TROUBLESHOOTING

CAN'T DISPLAY NETWORK

POSSIBLE REASON

The USIM card has been incorrectly inserted.

The phone has been set to Airplane Mode.

SOLUTION

Refer to the USIM card insertion method.

Change the setting when it is safe to do so.

THE MOBILE DOES NOT RECOGNISE THE MEMORY CARD

POSSIBLE REASON

The memory card has been incorrectly inserted.

The memory card has been damaged.

SOLUTION

Insert the memory card correctly according to instructions in the user manual.

Replace the memory card.

SAFETY AND MAINTENANCE

USAGE ENVIRONMENT

Please remember to obey the relevant rules and regulations whenever you use your mobile. This will help keep you and others around you safe.

- Switch off your mobile when close to petrol stations, bunkers, chemical factories or explosive areas and follow any safety signs and instructions there. Breaking any rules could cause explosion or injury.
- Using the mobile in a plane can cause interference and danger to an aircraft navigation system and network. You must switch off your mobile before boarding and make sure your mobile is switched off during the whole flight.
- Please place the mobile somewhere safe and don't put it on a seat or in places where it could fall and break. To keep safe on the road, please don't use the mobile when you're driving. If you must use it, please use the mobile on hands-free kit with a fixed cradle (and make sure you still exercise proper control of the vehicle) or stop at a safe location by the roadside before making or answering a call.

MEDICAL DEVICES

Please switch off your mobile near electronic medical equipment (such as heart pacemakers, hearing aids etc). Most medical devices can shield the mobile's RF signal, but some can't. If you have any questions or need to find out more, please consult your doctor or medical device manufacturer.

PACEMAKER

Pacemaker manufacturers advise keeping a distance between your mobile and heart pacemaker of at least 6 inches (15.3cm), or the mobile could interfere with the pacemaker.

Anyone wearing a pacemaker should do the following:

- Always keep a distance between the mobile and pacemaker of more than 6 inches (15.3cm) when the mobile is switched on.
- Avoid carrying the mobile in a breast pocket.
- Listen to the mobile using the ear on the opposite side of the body to the pacemaker.

Caution
If you are unsure as to the level of interference, please switch off the mobile at once and consult a doctor immediately.

SAFETY AND MAINTENANCE

HEARING AIDS

Phones may cause interference to some hearing aids. If there is any interference, please get in touch with the manufacturers of the hearing aid immediately.

EMERGENCY CALLS

It is impossible to ensure your mobile can be connected successfully in every situation, so please don't rely purely on your mobile as the only means of communication in an emergency (such as medical first aid).

MAKE AN EMERGENCY CALL

If your mobile is switched off, please turn on your mobile and check whether the network signal is strong enough.

You can't use Skype to make emergency calls.

- 1. Input the local emergency number correctly (such as 999). Different areas have different emergency numbers.
- 2. Press  to call.

Caution
While making an emergency call, you should try to provide all important information correctly. Don't end the call without being told to do so by the emergency services.

PASSWORD ACCESS

Your mobile and USIM card can be protected by a password to stop others using it without your permission.

PHONE PASSWORD

This protects your handset from unauthorised use by other people. The preset password is 0000.

Please modify your handset password as soon as possible and keep it secret.

PIN CODE

This is a personal identification code which is used to protect the USIM card from unauthorised use by other people. Generally, the PIN code and USIM card are provided together. After activating the PIN code, you can use the handset normally by correctly inputting your password each time.

Caution
If you input your PIN code incorrectly three times in succession, the USIM card will be locked. You will need to input the PUK code to unlock it. (If you don't have a PUK code, please contact your operator and USIM card provider for this information. Please input all characters.)

HELP

TROUBLESHOOTING

SAFETY AND MAINTENANCE

INDEX

SAFETY AND MAINTENANCE

PIN2 CODE

This is the password which activates the special USIM card functions. Usually, the PIN2 code and the USIM card will be provided together. If you incorrectly input the PIN2 code three times in succession, it will be locked and you will need to input PUK2 to unlock it again.

PUK CODE

This is used to unlock the PIN code. If you incorrectly input the PUK code ten times in a row, then the USIM card cannot be used again. Usually the PUK code and USIM card are provided together. If you lose PUK code or it isn't supplied with USIM card, please contact your network operator or USIM card provider.

PUK2 CODE

This is used to unlock the PIN2 code. Usually the PUK2 code and the USIM card are provided together. PUK2 can modify the locked PIN2 code. If you incorrectly input the PUK2 code ten times in a row, you will not be able to access some of the functions. Please apply to your operator for a new card. The PUK2 code cannot be changed. If you lose it, please contact your service provider.

NOTE ABOUT CHARGING THE BATTERY

The handset uses a lithium battery. How long a charged battery lasts will be influenced by the system's environment and mobile settings.

- Please use the battery and charger provided by INQ with this handset. INQ will take no responsibility for damage caused by using the wrong battery or charger.

Caution
Generally, the charging time is 3-5 hours according to the current status of the mobile (whether switched on, making a call, etc).

- Don't touch the handset, battery or charger with wet hands while it's charging.

Caution
To charge a new battery as fully as possible, please charge and discharge the mobile twice or three times.

BATTERY INFORMATION AND CARE

- Never use any battery that has been damaged.
- When you use the handset near a network station, the power consumption is very low, which means that how long

HELP

TROUBLESHOOTING

SAFETY AND MAINTENANCE

INDEX

SAFETY AND MAINTENANCE

you can use it before charging the battery depends greatly on the signal strength of the network and other factors.

- The battery charging time will depend on the amount of electricity remaining and the type of battery and charger used. When the operation time is noticeably shorter than normal, it is time to buy a new battery.
- Only use batteries that are compatible with your handset and only recharge your battery with a compatible charger. If a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, as overcharging may shorten its life.
- Do not connect the anode and cathode of a battery the wrong way round.
- Do not leave the battery in places with too high or too low temperature (such as in a car during summer or winter), or the battery capacity will be reduced and battery life will be shortened. Always try to keep the battery at room temperature.
- Do not short-circuit the battery. This may damage the electronic core or the protected circuit inside the battery.

Accidental short-circuiting can take place when a metal object (coin, clip or pen) causes a direct connection between the anode and cathode of the battery, for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting. So please store the battery carefully and on its own.

- Don't burn your handset battery or treat it as common rubbish. Please follow the local environmental policy in order to avoid endangering life and causing environmental damage, and recycle your batteries.
- If your handset, battery or other charging device leaks due to carelessness, you must not put it inside any piece of equipment that heats up (such as drier, microwave etc). The handset or other products may go wrong, and you could even cause the handset, battery or other charging device to burn, expand and explode.

INQ will take no responsibility for any direct or indirect damage caused by user error.

HELP

TROUBLESHOOTING

SAFETY AND MAINTENANCE

INDEX

SAFETY AND MAINTENANCE

NOTE ABOUT USING SPARE PARTS

- Please put all spare parts (such as USIM card, storage card, battery, etc) out of reach of children.
- Please switch off the handset and disconnect the handset and charger before removing the battery from the mobile.
- As the mobile’s spare parts are not waterproof, please keep all spare parts dry.
- You should pull out the plug of any spare part correctly when you switch off the power; don’t pull strongly on the power line.

If the handset, battery and charger don’t operate normally, please contact one of our maintenance centres with a qualified repair service as soon as possible.

OTHER SAFETY INFORMATION

- When you are not using your handset, it is a good idea to switch it off. You can remove the battery to save energy.
- If you use earphones to listen to music or watch a film, please don’t turn the volume up too high as this could damage your hearing.
- Don’t dismantle the terminal and battery of the mobile – this should be left to qualified staff.

Safety precautions.

Cautions:

Any unapproved changes or modifications by the party responsible for compliance might infringe the user's authority to operate this mobile phone.

This mobile phone may generate radio frequency energy, which, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this mobile phone does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try one or more of measures listed below to clear the interference:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Attention:

1. Please send used li-ion batteries to appropriate disposal locations or return them to our company. Do not dispose of the batteries in the dustbin.
2. For body worn operation this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines

Statement: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
